About me

Junior Quality Assurance Engineer. I have a craving for new knowledge and technologies, so I have a desire to work in this field, to join and help create quality software. I quickly perceive new information, filter it and arrange it on the shelves according to priorities. Having a good sense of different issues, I responsibly approach the solution of various tasks and pay attention to details to detect deviations in further quality assurance processes. Open to new knowledge and development in this direction. At the moment, I am mastering the basics of Automation QA engineer.

Experience

- Web testing
- Cross-browser, Cross-platform testing (BrowserStack)
- Writing test plans, and test cases
- Mobile testing
- Writing bug reports
- Work in Git version control system
- Usability testing
- Experience in bug tracking systems Redmine, Mantis, Bugzilla, Jira

Education

IT Step Academy, at the stage of studying automated testing
Cisco Networking Academy
Master's Diploma field of study Education institution management obtained qualification of Manager of the institution and organization (in the sphere of education and practical training)

Language skills

English - Elementary/documentation reading level
Ukrainian - Native
